

**SAMARIT**  
improving patient care

## BLUE TRANSFER BOARD

### The safe way to transfer patients

A legal requirement in some countries, taken for granted in others – working conditions should be as comfortable as possible. Healthcare workers should avoid lifting when transferring patients. **SAMARIT Products** assist with transfer, without the need to lift. The products are designed to facilitate the transfer without using a lot of effort, thus making the work easier for the carers and kinder to their backs. Can be ordered as OEM product.
